HTML	CSS
JavaScript	Node.js
Express	React.js
Vue.js	
Handlebars.js	Bootstrap
MongoDB	
MySQL	
REST-API	
SOAP-API	
GraphQL	
Git	

EXPERIENCE

FRONT-END WEB DEVELOPER INTERN

OpenEye Scientific / Cadence, Santa Fe, NM / May 2022-Sep 2022

- Using Vue.js and JavaScript, I created the functionality of synchronized browser windows using IndexedDB as the centralized state for all browser windows to reference. This allowed data tables and charts created using AG-Grid to communicate across independent browser windows.
- Prepared and presented final project demo to all major development teams.
- Front End team was excited to perform further testing and prepare feature for future implementation

BUSINESS ADMINISTRATOR / ASSISTANT SOFTWARE MANAGER

EMR-Bear, Santa Fe, NM / Feb 2020-Oct 2021

- Management of Technical Licenses and Certificates for software products
- Collaborated with Development team regarding schedule for building features and fixing issues
- Performed UI testing to ensure seamless functionality and optimal usability
- Managed and interfaced with 3rd party technical audit process
- Creation and management of all client contracts

PROJECTS

STOX-STER - Dec 2021

Stox-ster is an application that allows users to create and save a custom stock watchlist using browser local-storage. Stox-ster provides live stock prices, interactive historical stock charts and trending news related to stocks in the watchlist using Open API sources.

Technologies, Languages and Frameworks: HTML, CSS, JavaScript, Bootstrap, Open-API

Github Repository: <https://github.com/IanMordaunt/Stox-ster>

Deployed Project: <https://ianmordaunt.github.io/Stox-ster>

AUTO PARTS INVENTORY TRACKER - Feb 2022

Auto Parts Inventory Tracker gives an auto shop the ability to track, manage, and update store parts inventory, as well as leave comments on specific parts for future reference. The user can review parts inventory of other auto shops in the region.

Technologies, Languages and Frameworks: HTML, CSS, JavaScript, Node.js, Express, Handlebars.js, MySQL, Bulma

Github Repository: <https://github.com/IanMordaunt/Auto-Parts-Inventory>

Deployed Project: <https://auto-parts-inventory-tracker.herokuapp.com/>

DRIP COFFEE BLOG - March 2022

DRIP is a team developed blog platform for coffee enthusiasts. DRIP allows users to create a profile, which gives them access to create posts, view post history and editing capabilities to any post made. Users can comment on blog posts made by others users creating a discussion friendly environment.

Technologies, Languages and Frameworks: HTML, CSS, JavaScript, Node.js, Express, React.js, MongoDB, Bootstrap

Github Repository: <https://github.com/BennetWilson/drip-coffee-blog>

Deployed Project: <https://drip-coffee-blog-mern.herokuapp.com/>
