TECHNICAL SKILLS

HTMI **CSS**

JavaScript

Node.js

Express

React.is

Vue.js

Handlebars.js

MongoDB

MySQL

Git

SUMMARY

Aspiring Full-Stack Web Developer. Experience developing applications using primarily JavaScript frameworks. Building applications that bring functionality and ease to any task is the goal. As a developer the opportunity to create and learn everyday is incredibly rewarding. Whether it's putting the final polishing touches on the UI or manipulating collections in the Database, I find all aspects of Full-Stack development to be exciting and engaging.

EXPERIENCE

Front-End Web Developer Intern

OpenEye Scientific / Cadence, Santa Fe, NM / May 2022-Sep 2022

- Build and manage an intern project that brings additional functionality to the existing application UI.
 Learned and used new code libraries to bring a data to life thru data
- tables, grids and charts
- Collaborate with the Front-End Development team through daily team meetings and production review meetings.
- Created pull-requests and participated in constant code review sessions with intern mentor / front-end team members.
- Created and managed GitHub repository branches
- Prepared and presented final project demo to all major development teams.

BUSINESS ADMINISTRATOR

EMR-Bear, Santa Fe, NM / Feb 2020-Oct 2021

- Management of Technical Licenses and Certificates for software products

M3 Engineering/Tucson, AZ / Dec 2007 - May 2010

- Civil Engineering Auto-Cad drafting
- Project phase and inventory management
- Development of project schedules timeline
- Project proposal creation
- Client interaction
- Technical site visits

PROJECTS

STOX-STER: Dec 2021

Stox-ster is an application that allows a user to create and save a custom stock watchlist using browser local-storage. Stox-ster provides live stock prices, interactive historical stock charts and trending news related to the stocks in the watchlist using Open API sources.

<u>Technologies, Languages and Frameworks:</u> HTML, CSS, JavaScript, BootStrap, Open API

Github Repository: https://github.com/lanMordaunt/Stox-ster

Deployed Project: https://ianmordaunt.github.io/Stox-ster

WEATHER DASHBOARD: Jan 2022

Weather Dashboard uses the Open Weather API source to fetch data related to global weather conditions. The application then allows the user to search for the current weather conditions and 5 day forecast for any city.

Technologies, Languages and Frameworks: HTML, CSS, JavaScript, BootStrap, Open API

Github Repository: https://github.com/lanMordaunt/Weather_Dashboard

Deployed Project: https://ianmordaunt.github.io/Weather_Dashboard/

AUTO PARTS INVENTORY TRACKER : Feb 2022

Auto Parts Inventory Tracker gives an auto shop employee the ability to track and manage in store inventory. The user has the ability to track and update existing inventory of a specific part. As well as leave comments related to a specific part for future reference. The user also has the ability to review part inventory of other auto shops in the region.

<u>Technologies, Languages and Frameworks:</u> HTML, CSS, JavaScript, Node.js, Express, Handlebars.js, MySQL, Bulma

Github Repository: https://github.com/lanMordaunt/Auto-Parts-Inventory

<u>Deployed Project:</u> https://auto-parts-inventory-tracker.herokuapp.com/

DRIP Coffee Blog: March 2022:

DRIP is a coffee enthusiast blog platform. A place for coffee lovers to share anything coffee. DRIP allows for the user to create a profile, which gives them access to create posts, post history and editing capability to any post made. Users can comment on blog posts made by others users creating a discussion friendly environment. DRIP also provides users with unique brewing methods and recipes for brewing coffee using those unique methods.

<u>Technologies, Languages and Frameworks:</u> HTML, CSS, JavaScript, Node.js, Express, React.js, MongoDB, Bootstrap

Github Repository: https://github.com/BennetWilson/drip-coffee-blog

Deployed Project: https://drip-coffee-blog-mern.herokuapp.com/
